

MPOT POTENTIOMETER MODULE

10K-Ohm/270 degree with relay

270° potentiometer with relay contact 10 kΩ

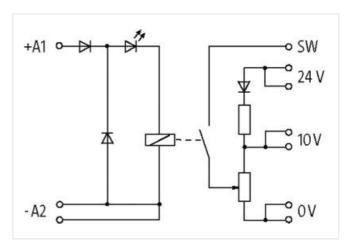

The 10-turn potentiometer has a decimal scale and locking lever

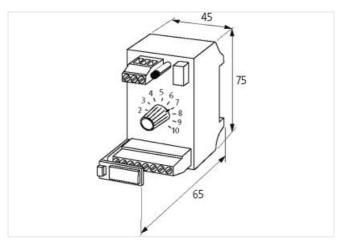

The potentiometer modules are fitted with standard values. They are available as 270° potentiometer and as 10-turn potentiometer with fine adjustment. They can be operated with 10 V DC or 24 V DC. A resistor reduces the voltage so that a 24 V DC voltage can be reduced to operate between approx. 0...11 V. The connection is via terminals. A set-point can also be switched-on using an integrated relay and separate output. Several elements can be daisy-chained.

Packaging unit	1	
Electrical data		
Power max.	1 W	
Linearity	±3 %	
Resistance	10 kΩ	
Resistance tolerance	20 %	
Electrical data Input		
Input voltage DC	24 V	
Input current	20 mA	
Power loss max.	0,25 W	
Electrical data Output		
Voltage switching DC min.	10 V	
Switching voltage DC max.	24 V	
Switching current min.	1 mA	
Switching current max.	1 A	
Diagnostics		
Status indication LED	green	
Mechanical data Material data		
Material contact	Pd Ni-Au Rh	
Mechanical data Mounting data		
Mounting method	geschnappt	
Suitable for mounting type	mounting rail, (EN 60715)	
Height	75 mm	
Width	45 mm	
Depth	65 mm	
Environmental characteristics Climatic		
Operating temperature min.	0 °C	
Operating temperature max.	60 °C
